

IGNACIO GEA GONZALEZ

New York, NY | (737) 336-1356 | igeagonz@gmail.com | ignaciog.xyz | [LinkedIn](#)

SUMMARY

Full-stack Software Engineer with 8 years of experience building and scaling enterprise software. Proven track record of delivering quality features with a high velocity. Specialized in Ruby on Rails and JavaScript, and always eager to learn and adopt new technologies. Derives enjoyment from crafting smooth, performant product experiences, mentoring teams, collaborating with talented individuals, and continuously learning from those around me.

WORK EXPERIENCE

Senior Software Engineer at Vantage | New York, NY | January 2023 – Present

Joined early in the company's growth phase, contributing to core architecture and end-to-end product development at a leading FinOps platform.

- Designed and implemented reporting infrastructure powering financial analytics and customer-facing dashboards.
- Introduced a component-based Vue architecture within the Rails monolith, improving developer velocity and UI performance.
- Led development of major backend initiatives, including multi-currency support and invoicing features, and delivered enhancements such as commitment tracking and network flow reporting that expanded product capabilities and customer reach.
- Collaborated across product, design, data, and marketing teams to take product ideas from ideation to production.

Senior Software Engineer at Spiceworks | Austin, TX | January 2020 – January 2023

Contributed to the Cloud Help Desk and Cloud Tools products, focusing on front-end modernization and product usability.

- Owned and led the rebuild of the Cloud Help Desk UI, now the production interface used daily by thousands of IT professionals.
- Architected a responsive design system that enabled native iOS and Android app releases.
- Collaborated across the stack on the Cloud Tools suite — including Help Desk, Cloud Inventory, Connectivity Dashboard, and Contracts — extending and integrating APIs within a distributed system built on Ruby on Rails, Elixir/Phoenix, VueJS, and EmberJS.

Associate Senior Software Engineer at Cerner Corporation | Kansas City, MO | June 2017 – January 2020

Physician Documentation Dev: Active contributor & maintainer of apps used by medical practitioners to document patient encounters

- Built Ruby on Rails and React components interfacing with Java REST services as part of a cloud migration initiative.
- Contributed to MFC/C++ desktop applications and XSLT-based templating systems supporting multiple clinical visit types.
- Co-led test automation strategy and mentored QA analysts in transitioning to a script-based testing framework.

IT Application Analyst & Developer at GE Power | Schenectady, NY | May 2016 – September 2016

ITLP (Information Technology Leadership Program) Intern for Enterprise Application Services team

- Identified redundant internal systems post-acquisition, recommending consolidations that saved \$470K annually.
- Led a team of 13 interns to deliver two internal web projects, including a digital campus map and intern portal updates.

IT Support Technician for University of Arkansas | Fayetteville, AR | April 2015 – May 2017

Helpdesk and Desktop technical support for business staff, faculty and students from the Walton College of Business

- Provided technical support for over 300 faculty and staff at the Walton College of Business.
-
